API integration design · Data contracts · Confluence · Process documentation · System documentation

PROFESSIONAL SUMMARY

Business and System Analyst with 5+ years of experience leading discovery, alignment and delivery support across insurance platforms, internal AI initiatives and enterprise change. Works across business stakeholders, architects, developers, UX and QA to turn ambiguous goals into implementable scope, decision-ready requirements and rollout plans. Experienced in AI enablement, internal AI assistants and RAG-style knowledge flows where adoption depends on communication, governance and operational fit. Combines structured analysis, executive-ready communication and multilingual stakeholder management across English, German and Polish.

PROFESSIONAL EXPERIENCE

System / Business Analyst — Apr 2024 - Present

ERGO Technology & Services · Warsaw, Poland (Remote)

Insurance technology organisation delivering bancassurance, life insurance, ESG and customer portal initiatives, alongside internal AI enablement work.

- Lead analysis for insurance and internal AI initiatives, translating business goals into decision-ready scope, user stories, functional specifications and test scenarios.
- Shape AI-supported workflow opportunities and define internal assistant use cases with business stakeholders and delivery teams.
- Co-design RAG-style knowledge flows across distributed data sources with attention to adoption, governance and operational fit.
- Design API-based integrations between core insurance systems, front-end applications and supporting services, clarifying data contracts, business rules and delivery dependencies.
- Partner with developers, architects, UX, QA and product owners to align solutions, support UAT and rollout readiness, and keep delivery aligned with business constraints.

Junior System / Business Analyst

Jul 2022 - Apr 2024

ERGO Technology & Services · Warsaw, Poland

- Translated business goals into Jira stories, acceptance criteria and functional detail for bancassurance feature teams.
- Maintained requirements, process flows and decision context in Confluence so business and delivery stakeholders shared a current source of truth.
- Worked with developers, UX designers and architects to refine solution concepts, remove ambiguity and support rollouts.
- Led refinement sessions, supported testing and gathered stakeholder feedback to confirm delivered functionality matched expected outcomes.

IT Service Desk Analyst

Jul 2021 - Jul 2022

Sharp Europe · Warsaw, Poland

- Supported English-, Polish- and German-speaking users in a 24/7 enterprise environment, handling L1/L2 troubleshooting and escalation.
- Worked across Microsoft enterprise environments including Windows Server, Exchange, Office 365, Active Directory and Azure Active Directory administration.
- Built a structured knowledge base from scratch, documenting troubleshooting paths and reusable resolution methods.

IT Analyst (First and Second Line Support)

Nov 2019 - Jul 2021

Computacenter · Poznań, Poland

Enterprise support delivery for Airbus Commercial and ITERGO service operations.

- Supported Airbus Commercial and ITERGO users across first- and second-line service desks, providing remote troubleshooting, ticket routing and resolver-group coordination.
- Supported the Berlin-to-Poznań transition through knowledge transfer, analyst enablement and training for new team members.
- Worked with ServiceNow and BMC Remedy while creating knowledge articles and resolving escalated tickets.
