- German - Fluent

PROFESSIONAL SUMMARY

Business and System Analyst with 5+ years of experience translating business needs into structured requirements, process flows, functional detail and delivery support across insurance and enterprise platforms. Experience spans discovery, backlog support, testing, rollout support, documentation and multilingual stakeholder communication. Works across AI-supported workflow improvement, API-based solution design and operational coordination without changing verified chronology or scope. Background also includes enterprise IT support, knowledge base creation and cross-team service delivery in English, German and Polish.

PROFESSIONAL EXPERIENCE

System / Business Analyst

Apr 2024 - Present

ERGO Technology & Services · Warsaw, Poland (Remote)

Insurance technology organisation delivering bancassurance, life insurance, ESG and customer portal initiatives, alongside internal AI enablement work.

- Translate business goals into scope, user stories, functional specifications and test scenarios for insurance and internal AI initiatives.
- Identify workflow improvement opportunities, including AI-supported use cases with measurable operational value.
- Define internal assistant and knowledge-retrieval use cases across distributed data sources.
- Design API-based integrations between core insurance systems, front-end applications and supporting services.
- Support developers, architects, UX, QA and product owners through refinement, UAT and rollout readiness.

- Polish - Fluent

Junior System / Business Analyst
Jul 2022 - Apr 2024

ERGO Technology & Services · Warsaw, Poland

- Translated business goals into Jira stories, acceptance criteria and functional detail for bancassurance feature teams.
- Maintained requirements, process flows and decision context in Confluence so delivery teams had a clear, current source of truth.
- Worked with developers, UX designers and architects to refine solution concepts, remove ambiguity and support rollouts.
- Led refinement sessions, supported testing and gathered stakeholder feedback to confirm delivered functionality matched expected outcomes.

IT Service Desk Analyst
Jul 2021 - Jul 2022

Sharp Europe · Warsaw, Poland

- Supported English-, Polish- and German-speaking users in a 24/7 enterprise environment, handling L1/L2 troubleshooting and escalation.
- Worked across Microsoft enterprise environments including Windows Server, Exchange, Office 365, Active Directory and Azure Active Directory administration.
- Built a structured knowledge base from scratch, documenting troubleshooting paths and reusable resolution methods.

IT Analyst (First and Second Line Support)
Nov 2019 - Jul 2021

Computacenter · Poznań, Poland

Enterprise support delivery for Airbus Commercial and ITERGO service operations.

- Supported Airbus Commercial and ITERGO users across first- and second-line service desks, providing remote troubleshooting, ticket routing and resolver-group coordination.
- Contributed to the Berlin-to-Poznań transition through knowledge transfer, analyst enablement and training for new team members.
- Worked with ServiceNow and BMC Remedy while maintaining knowledge articles and resolving escalated tickets.
