TECHNICAL SKILLS

Operations and transformation:

Workflow improvement · Process mapping · Requirements analysis · Backlog support · Functional specifications · UAT support

Delivery and support:

Service delivery coordination · Knowledge base creation · Rollout support · Stakeholder communication · Multilingual end-user support

PROFESSIONAL SUMMARY

Business and System Analyst with 5+ years of experience improving operational workflows, requirements quality and service delivery across insurance and enterprise support environments. Turns business needs into clear user stories, specifications, process documentation and rollout support that reduce ambiguity for delivery teams. Applies AI-supported workflow improvement, API integration thinking and knowledge-management discipline to day-to-day transformation work. Built foundations in enterprise service desks, knowledge transfer and multilingual user support across English, German and Polish.

PROFESSIONAL EXPERIENCE

System / Business Analyst

Apr 2024 - Present

ERGO Technology & Services · Warsaw, Poland (Remote)

Insurance technology organisation delivering bancassurance, life insurance, ESG and customer portal initiatives, alongside internal AI enablement work.

- Translate business goals into scope, user stories, functional specifications and test scenarios for insurance and internal AI initiatives.
- Identify workflow bottlenecks and shape AI-supported use cases with measurable operational value.
- Define internal assistant and RAG-style knowledge flows across distributed data sources to improve access to business context.
- Design API-based integrations between core insurance systems, front-end applications and supporting services, covering data contracts, business rules and edge cases.
- Support delivery through refinement, UAT, rollout readiness and coordination across developers, architects, UX, QA and product owners.

Systems and knowledge flows:

API integration design · Data contracts · Internal AI enablement · RAG-style workflows · System documentation

Junior System / Business Analyst

Jul 2022 - Apr 2024

ERGO Technology & Services · Warsaw, Poland

- Translated business goals into Jira stories, acceptance criteria and functional detail for bancassurance feature teams.
- Maintained requirements, process flows and decision context in Confluence so delivery teams had a clear, current source of truth.
- Worked with developers, UX designers and architects to refine solution concepts, remove ambiguity and support rollouts.
- Led refinement sessions, supported testing and gathered stakeholder feedback to confirm delivered functionality matched expected outcomes.

IT Service Desk Analyst

Jul 2021 - Jul 2022

Sharp Europe · Warsaw, Poland

- Supported English-, Polish- and German-speaking users in a 24/7 enterprise environment, handling L1/L2 troubleshooting and escalation.
- Worked across Microsoft enterprise environments including Windows Server, Exchange, Office 365, Active Directory and Azure Active Directory administration.
- Built a structured knowledge base from scratch, documenting troubleshooting paths and reusable resolution methods.

IT Analyst (First and Second Line Support)

Nov 2019 - Jul 2021

Computacenter · Poznań, Poland

Enterprise support delivery for Airbus Commercial and ITERGO service operations.

- Supported Airbus Commercial and ITERGO users across first- and second-line service desks, providing remote troubleshooting, ticket routing and resolver-group coordination.
- Supported the Berlin-to-Poznań transition through knowledge transfer, analyst enablement and training for new team members.
- Worked with ServiceNow and BMC Remedy while creating knowledge articles and resolving escalated tickets.
